PRINTED AND MADE IN GREAT BRITAIN

PREFATORY NOTE

THIS eighty-sixth yearly issue of THE ENGLISH CATALOGUE OF BOOKS comprises the titles (under authors, and subjects or titles) of works published during 1922, and also of some received too late for inclusion in the eighty-fifth issue.

The main entry for each book begins with the author's surname (if known) in **heavy type.** As an index to these "Author" records, entries are also made under the titles, commencing with their most important words (which usually indicate the *subjects* with which the books deal), or with the first words. Many other index entries are also made under subjects in order to make the CATALOGUE of use to persons in search of the literature of a particular topic, as well as to those requiring a particular book. The name or word under which the main entry appears is printed in *italics* in these index entries, thus giving a reference to the place where the full information about a book may be found. Main entries and index entries are in one alphabet.

Writers with compound names are entered under the first part of the name, *e.g.*:—

Ashley-Cooper (F. S.)

and accordingly must be looked for in that order. References are also made, however, from the last part of the name.

The publications of learned Societies are recorded in an Appendix.

The names and addresses of the Publishers of Great Britain and Ireland, followed by those of the principal publishers in the United States and Canada, will be found at the end of the volume. The telegraphic and cable addresses and telephone numbers have been added when known.

In response to a published request, particulars of a number of British Agents of American and Colonial publishers have been received, and these have been added to the names of the firms they represent.

Following the Preface is an analysis of the books of the year 1922, showing in detail the number of works in each class of literature, and giving the proportions of new books, translations, pamphlets, and new editions.

Every effort has been made to obtain the full particulars of the books noted. Special enquiries were made in every case where information was deficient; and most publishers courteously responded. In the cases where entries have been included without prices, the fault lies with the publishers concerned.

Hearty thanks are due to the many publishers, secretaries, librarians, authors and bibliographers who have assisted in making this book more correct and comprehensive than it would have been otherwise.

The Editor will be glad to have particulars (author, title, size, price, publisher, and month of publication) of any work which may have been omitted. Information regarding each book should be given on a separate slip of paper or postcard. It should be addressed to *The Editor of* THE ENGLISH CATALOGUE OF BOOKS, "Publishers' Circular" Office, 19, Adam Street, Strand, London, W.C.2.

THE EDITOR.

January, 1923.

ERRATA

The publishers of Green's "Coccidae of Ceylon" (p. 119), and Hooker's "Icones plantarum" (p. 135), are Messrs. DULAU & CO., LTD., and not Messrs. Reeve, as stated.

ANALYSIS OF BOOKS

PUBLISHED DURING 1922 IN THE UNITED KINGDOM

THE PUBLISHERS' CIRCULAR records a total of 10,842 books as having been published in the United Kingdom during the year 1922.

This is a decrease of 184 as compared with the total for 1921, but it will be seen from the analytical tables appended that this decrease has been entirely in the issue of "New Editions." It is remarkable that the number of "New Books" published during the year is only three less than the number published during 1921.

The table showing the number of books published each month reveals a striking difference in the seasonal distribution of publishing activity. The first months of the current year fell far below the corresponding period of 1921; while the later months, notably October and November with totals of over twelve hundred each, rose to a height not approached in 1921. The following table shows how the current year commenced by being behind and ended by being in front of 1921 in the number of books issued:—

Jan.—June.		July—Dec.	
1921.	1922.	1921.	1922.
5,474 ···	4,855	5,552 ···	5,987

Whether or not this intense seasonal activity is good business from the publishers' point of view is for them to decide. There is no doubt whatever that it is a serious drawback from the point of view of book-buyers (we mean the larger, constant book-buyers), reviewers, and last—though by no means least—readers. Not only do books pour in a great flood from the publishers during certain months of the year, but many of the best books are kept back to join this flood. The effect of this is obvious. Many good books are submerged that would have a greater success if they appeared in less crowded times; and while during part of the year our buyers, reviewers and readers are overwhelmed by a flood with which they are unable to cope, at other times they are left with an unsatisfying trickle. Last year there were signs that the "seasons" were disappearing in a more constant level throughout the year, but this year they are back again with renewed vigour. No doubt the trade "strikes" during the early part of the year have had a good deal to do with this.

The "Classified Analysis" shows how the totals for the various kinds of books vary from those of last year. The following classes show appreciable *increases*: Poetry and Drama (+ 85), Games, Sports, etc. (+ 74), General Works (+ 64), and Philology (+ 41). Decreases are to be noted in History (—106), Description and Travel (—98), Military and Naval (—97), Medicine (—76), Technology (—76), Education (—54), and Religion (—32). The minor increases and decreases are shown by the Table. The drops in History, Military and Naval, and Medicine are no doubt due to the waning influence of the war on those subjects. The most striking increase is that in Poetry and Drama, again largely due to the appearance of many small booklets of verse.

It is interesting to compare the order in which the totals of the chief classes of literature appear this year and in the last pre-war year, because these totals furnish a rough indication of the preferences of the reading public:—

1914.	1922.
(1) Fiction	(1) Fiction
(2) Religion	(2) Sociology
(3) Science	(3) Juvenile
(4) Sociology	(4) Religion
(5) Technology	(5) Poetry
(6) Poetry	(6) Technology
(7) Juvenile	(7) Science
(8) Description	(8) Description
(9) Literature	(9) Literature
(10) History / Medicine	(10) Biography
(11) Biography	(11) History
(12) Military and Naval	(12) Medicine

The following totals for the last ten years are also of considerable interest:—

Year.	New Books.	New Editions.	Total.
1913	9,541	2,838	12,379
1914	8,863	2,674	11,537
1915	8,499	2,166	10,665
1916	7,537	1,612	9,149
1917	6,606	1,525	8,131
1918	6,750	966	7,716
1919	7,327	1,295	8,622
1920	8,738	2,266	11,004
1921	8,757	2,269	11,026
1922	**8,754**	**2,088**	**10,842**

Further detailed information regarding the year's publishing is supplied by the appended analytical tables. It should be noted that "Education" includes only books about educational theory and practice, and not text-books on special subjects which are classed under their

subjects; and that all publications of 48 pages or less are counted as "pamphlets." It would be possible to swell the totals to an enormous extent by counting all kinds of printed matter (such as ephemeral pamphlets and leaflets, local government publications, musical texts, etc.), but the purpose of this table is to represent the book publishing activity of the United Kingdom. This should be noted in comparing the figures with those of other countries, in some of which single copies of newspapers are counted separately. In these tables each complete publication is counted as one, whether it is in one or more volumes. Serials that appear later as a collected volume are counted as an ordinary book on the appearance of that volume; so that, for example, the series of "Statutory Rules and Orders" issued by the Government, and amounting to hundreds in the year, are counted as one item on the appearance of the annual collected volume.

Scientific proceedings (quarterly), 12s. ea. part
Zoological record. The object of the Zoological Record is to give, by means of an annual volume, complete lists of the works and publications relating to zoology in all its branches that have appeared during the year preceding the issue of the volume, together with a subject and systematic index. £3 per volume, or subscription 50s.

DIRECTORY OF PUBLISHERS

Publishers are invited to send us their Telegraphic Addresses and Telephone Numbers. Those sent will be found below between square brackets [ ], and separated from each other by a semicolon (;). The Editor will be glad to be notified of any inaccuracy in the following lists for correction in subsequent volumes.

This list of Publishers, with their Addresses, has been compiled principally with a view to supplying information regarding the books in the English Catalogue. This will explain the inclusion of some firms in the list who can scarcely, in the strict acceptation of the term, be called Publishers, since the publication of books forms only an occasional part of their business.
